MP3 Report

Joseph Martinsen

The following table are my findings from running on my laptop with the following specs

OS: *x86_64*

Kernel: *3.13.11-31.current*

CPU: *Intel i7-7500U (4) @ 3.500GHz*

Memory: *7791MiB*

There are three users. The number of request will remain constant at 10,000.

With 10 requests channels and 100 requests the time was 1.602s. For some reason, this is slower than my times recorded in MP3
